

Call for abstracts

The Clinical Quality Conference brings attention on results and possibilities of data driven quality improvement to support quality improvement of Danish healthcare. As part of the programme, you are given the opportunity to present your research results based in part or mainly on clinical data from national clinical registries.

You have the opportunity to:

- highlight significant results within your medical area of expertise
- strengthen the national clinical registries, so they can continue to facilitate improvements in quality of care
- enable your research to attract the attention of leading clinicians and decision makers
- establish or maintain your professional network within your area of expertise

Deadline is the 15th of September 2021

Read more about the conference and guidelines on:

<https://tilmeld.events/kvalitetskonference2021/conference>

Note: it is possible to give oral presentations in English if preferred
